1.	Data professionals use input validation to ensure data is complete, error-free, and of high-quality.	1/1 point
	True	
	○ False	
2.	Fill in the blank: If a dataset lacks sufficient information to answer a business question, the process of makes it possible to augment that data by adding values from other datasets.	1/1 point
	joining	
	Summing	
	Oblending	
	○ sampling	
	Orrect  If a dataset lacks sufficient information to answer a business question, the process of joining makes it possible to augment that data by adding values from other datasets. Joining is most useful if the new data is validated to ensure its format and data entries align and are the same data type as the original dataset.	
3.	In which phase of the PACE workflow would a data professional perform the majority of the data-validation process?	1/1 point
	O Execute	
	O Plan	
	• Analyze	
	O Construct	
	Correct A data professional performs the majority of the data-validation process in the Analyze phase of the PACE workflow. However, it's important to prioritize data-validation throughout all four phases.
