1.	Fill in the blank: The presenting stage of exploratory data analysis involves sharing, which can include graphs, charts, diagrams, or dashboards.	1/1 point
	O databases	
	data visualizations	
	O data frames	
	O datasets	
	Correct The presenting stage of exploratory data analysis involves sharing data visualizations, which can include graphs, charts, diagrams, or dashboards.	
2.	During which exploratory data analysis practice might a data professional familiarize themself with the meaning of column headers in a dataset?	1/1 point
	O Joining	
	O Validating	
	Discovering	
	○ Structuring	
	Orrect A data professional might consider the meaning of column headers in a dataset during the discovering element of exploratory data analysis. This is when data professionals familiarize themselves with the data.	
3.	If sampled data is organized in such a way that it does not accurately represent its population as a whole, what problem will occur?	1/1 point
	O Unfiltered data	
	O Disorganized data	
	O Unclean data	
	Biased data	
	Correct If sampled data is organized in a way that does not accurately represent its population as a whole, it will be biased. Data bias occurs when a preference in favor of or against a person, group of people, or thing systematically skews data analysis results.
